

Charlotte Kapusta-Miller

In 2007, my mother died after a 2-year battle with pancreatic cancer. In her first year of having the disease she was misdiagnosed as a diabetic. In her 2nd year, she suffered terribly.

She is so missed by her family. I think of her every day and somehow still have to constantly remind myself that she is gone.

Pancreatic cancer does not get the same public attention and support that other cancers do. Please donate to this worthy cause in my mother's memory and help beat this dreadful disease.
