

## PATRICIA J. CORBETT

Patricia J Corbett

My mother Patricia J. Corbett never had a chance from the moment of diagnosis nor did she have a complaint. She fought her near 18 month battle with the same silent dignity and courage she had lived her life. She spent her last month's savouring any moment of joy for herself and others she could. Sadly, her battle ended in May of 2008 with her beloved husband of over 50 beautiful years by her side. My mother not only taught me how to live, she taught me how to say goodbye.

Her only regret and mine was the knowledge that early detection may have kept this beautiful woman in my life longer. During her life, my mother showed me the value of a true friend, the comfort of an unwavering love and the example of strength and dignity. It is only fitting that her immense spirit live on in efforts to help others enjoy more seasons in the sun together by finding methods of early detection.

Everyday her calm spirit and common sense disposition is with me as I am sure it is now in this amazing Foundation's efforts to light a new hope to possible tomorrows. My mother never wavered, never gave up and neither will we.
