

Patty Wiles

In late November 2010 Patty who had always been a picture of great health and living life to the fullest began to experience vague symptoms such as upper abdominal pain on the right side that radiated to her back- being a retired operating nurse of 38yrs- she chalked it up to gallstones and made an appointment with her family doctor who in turn sent her for an abdominal ultrasound and CT scan which confirmed the devastating diagnosis of Stage IV adenocarcinoma of the pancreas.

Friends and family sprang into action and a wonderful celebration came together on February 26, 2011 to boost her spirits. Not only did over 200 of her closest friends and family attend, there was an amazing band and a live auction was held. By the end of the day \$5000 was raised for Pancreatic Cancer Canada.

A special thank you to everyone who made the event such a success.

As Patty always says - "Life is Good".
