

Help us shed light on Pancreatic Cancer by supporting our Purple Lights Campaign

Remember those who lost their lives
to this devastating disease

Support those who are currently
battling this disease with limited
treatment options

Provide hope for future generations
that a cure is within our reach

The month of **November** is dedicated to bringing pancreatic cancer
into focus through **Awareness**.

PANCREATIC CANCER *Canada* is launching a
Purple Light Campaign
to bring attention to this devastating disease :

- The only one of the top 10 cancer killers that has a five year survival rate still in the single digits at 6%
- The average survival after a diagnosis of 3 to 6 months
- It kills nearly as many people as breast cancer each year
- A silent killer – no early symptoms, difficult to detect and spreads rapidly
- 4th leading cause of cancer death in Canada and the most lethal

We encourage you to take a few minutes this **November**
to hang purple lights on your home and shine more light on the

NEED TO FIND A CURE.
